

Swap to a renewable electricity supplier and £25 goes to Transition Montpellier

By changing to a 100% renewable electricity supplier you can immediately reduce your carbon emissions and make a contribution to the neighbourhood.

We have linked with Good Energy (see below), who will give Transition Montpellier £25 if you sign up through the weblink below (click on the picture) or quoting the affiliate code **GE414** if you switch by phone 0845 465 1640.

26% of CO2 emissions come from domestic buildings with half of this simply leaking out through lofts and walls. It would be great to build a team of people who can support others to make their homes less wasteful. Take a look at the Community Energy Efficiency Programme post for more information.
